EDUCATION

Assumption University, Bangkok, Thailand
Bachelor of Computer Science *(Expected Graduation: 2027)*

Relevant Coursework

- **Data Structures & Algorithms**
- **Object-Oriented Programming**
- **Software Engineering**
- **Database Systems**
- **Enterprise Application Development**
- **Mobile Application Development**
- **Web Application Development**
- **Cloud Computing**
- **Computer Networks**

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience developing data-driven applications, designing databases, integrating REST APIs, and presenting information through dashboards and interactive charts. Experienced with SQL, MongoDB, MySQL, Supabase, JavaScript, Python, and full-stack development. Interested in applying technology and data analysis to identify trends, improve business processes, and support data-driven decision-making. Eager to strengthen practical skills in Power BI, DAX, dimensional data modeling, and business reporting.

PROJECT EXPERIENCE

CampusFix AI HelpDesk System

React.js • Node.js • Express.js • MySQL • Prisma ORM • Microsoft Azure • Nginx

- Developed a full-stack university IT helpdesk application for students, faculty members, technicians, and administrators.
- Built RESTful APIs with Node.js and Express.js for ticket creation, assignment, comments, status updates, and user management.

- Implemented Microsoft Entra ID university login, JWT authentication, and role-based access control.
- Integrated Gemini AI to automatically categorize support tickets and recommend priority levels.
- Managed the relational MySQL database using Prisma ORM and database migrations.
- Deployed the application on a Microsoft Azure Linux virtual machine and configured Nginx as a reverse proxy.
- Configured an Azure DNS name and secured the deployed application with Let's Encrypt HTTPS.
- Used Azure Key Vault and the VM's managed identity to securely retrieve database credentials, JWT secrets, and API keys.
- Developed API-key-protected peer endpoints to exchange data securely with another backend system.
- Used GitHub for source-code management and created an automated deployment script for the Azure server.

Production Link -- > https://project1-backend.eastasia.cloudapp.azure.com/campusfix/

Expense Tracker Web Application

React.js · Node.js · Express.js · MongoDB · MERN Stack

- **Developed a full-stack expense management application using the MERN stack.**
- **Translated user requirements for income, expense, savings, and recurring-transaction management into functional CRUD workflows.**
- **Implemented secure JWT authentication and user profile management.**
- **Built complete CRUD functionality for income, expenses, savings goals, and recurring transactions.**
- **Integrated an AI-powered chatbot to provide financial insights and spending recommendations.**
- **Designed responsive dashboards with interactive charts and real-time financial analytics.**
- **Developed RESTful APIs using Express.js and MongoDB.**
- **Implemented reusable React components following modern frontend development practices.**

Aphrodite Shop – Laptop, PC Parts & Accessories E-Commerce Platform (In Progress)

Next.js · React · TypeScript · Tailwind CSS · Supabase · PostgreSQL · Docker · Google Cloud Run

- **Developed a full-stack e-commerce platform for laptops, PC parts, and computer accessories.**
- **Implemented customer authentication, role-based access control, shopping cart, wishlist, product comparison, and PC build planning.**
- **Built secure Next.js APIs with server-side validation, authoritative pricing, inventory-safe checkout, and Supabase Row Level Security.**
- **Developed an administrative dashboard for product synchronization, inventory management, order processing, delivery tracking, returns, and customer support.**
- **Integrated Google Sheets with the product catalogue to synchronize production inventory and product information.**
- **Containerized the application with Docker and configured automated deployment using Google Cloud Build and Google Cloud Run.**

Production Link -> https://aphrodite-shop-672175800144.asia-southeast1.run.app

OCR Document Web Application

React · JavaScript · OCR API

- **Developed a document management system that extracts text from uploaded images and PDFs using OCR technology.**
- **Implemented file upload, OCR processing, document preview, and extracted text visualization.**
- **Integrated third-party OCR APIs through RESTful services.**
- **Improved user experience through responsive interface design and document workflow optimization.**

FridgeChef Android Application

Kotlin · Android Studio · SQLite

- **Developed an Android application that helps users manage ingredients and discover recipes.**
- **Implemented complete CRUD operations for recipes and ingredient management.**
- **Built intuitive Android user interfaces using Kotlin.**
- **Applied SQLite for local data persistence.**
- **Managed Android Activity lifecycle and navigation components.**

TECHNICAL SKILLS

Programming Languages - JavaScript (ES6+), TypeScript (Basic), Kotlin, SQL, HTML5, CSS3,Python(Django)

Frontend - React.js, Next.js, Express.js, HTML5, CSS3, Responsive Web Design

Backend - Node.js, Express.js, RESTful APIs

Database - MongoDB, MySQL, SQLite, Supabase,

Mobile Development - Android Development (Kotlin) / IOS Development (Swift)

Tools & Platforms - Git, GitHub, VS Code, Android Studio, AWS Fundamentals, Prisma

Software Engineering - Object-Oriented Programming (OOP), Agile/Scrum, REST API Development, Debugging, Version Control (Git), Component-Based Architecture

System Analysis Focus: Requirement analysis, functional requirements, SRS documentation, API specifications, system diagrams, reverse engineering, use cases, user flows, and AI-assisted system analysis.

Cloud & DevOps: Amazon Web Services (AWS) cloud operations, Microsoft Azure, Google Cloud Platform (GCP), cloud security, and cloud development; Git/GitHub; Continuous Integration/Continuous Deployment (CI/CD) concepts; staging-to-production workflows.

DevOps Learning: Docker, Kubernetes, containerized deployment, Ubuntu/Linux administration, Bash/shell scripting, configuration management, maintenance automation, Google Cloud Platform (GCP)

Soft Skills - Problem Solving, Analytical Thinking, Team Collaboration, Communication, Fast Learner, Adaptability, Time Management, Attention to Detail

Languages -English (Professional Working Proficiency) , Burmese (Native) , Thai (Basic) , Japanese (Basic)
